

## INVESTMENT SERVICES

### Discretionary Asset Management

We offer a full portfolio management service enabling clients to focus on other priorities with the knowledge that their assets are being well managed.

Our global network of analysts and product specialists and our professional portfolio managers diversify clients' discretionary portfolio into a wide range of assets. In addition, our regional experts can incorporate local flavour into the global allocation of assets.

Taking a client's risk parameters, investment goals, currency preferences and any other specific instructions into consideration, we structure and manage the client's portfolio and can include alternative investments and proprietary or third party products.

### Alternative Investments – Hedge Funds

As an alternative to traditional portfolios of equities and fixed-income securities, hedge funds represent a distinct asset class with their own unique behavioural characteristics. Combined with traditional assets, the resulting portfolios offer superior risk-adjusted performance.

Hedge funds can serve to diversify your investments because they are not highly correlated with other asset classes.

Deutsche Bank's 'Fund of Hedge Funds' approach aims to alleviate two main risk factors - manager risk and market risk – and benefits to our clients by allowing access to leading fund managers and lower entry levels.

### Structured Products

Deutsche Bank can offer financial structures which will participate in global markets opportunities whilst providing principal protection or a limited down side risk.

Capital Protected Products - Equity linked notes offer investors the possibility to participate in individual stocks, equity baskets or equity indices while benefiting from full or partial capital protection.

Tracker Certificates – An efficient form of equity index tracking providing one-to-one exposure to predetermined underlying securities (e.g. equity basket, fund).

We can offer customised products for individual clients with a minimum investment of €2,000,000.
